

IGNACIO TRKMIC TORRES

FULL-STACK DEVELOPER & MECHANICAL ENGINEER

[Berazategui, Argentina](#) | trkmicignacio@gmail.com | [01127161063](tel:01127161063) | [LinkedIn](#)

PROFESSIONAL PROFILE

Full-stack Developer and Mechanical Engineering student passionate about building efficient digital solutions. I combine the analytical logic of engineering with advanced programming skills to solve complex problems. Advanced student in the Programming Technician degree (2 subjects away from graduation) and currently pursuing a Mechanical Engineering degree. I have practical experience in API development, database management (SQL/NoSQL), and technologies such as NestJS, Python, and Java. Intermediate-advanced English level (B2).

PROJECTS

Hospitality and Gastronomy Management System | Java, OOP

- Designed a tourism service management system focused on Object-Oriented Programming.
- Programmed algorithms for dynamic cost calculations and efficient inventory control.

Social Network (Full Stack) | NestJS, Angular, MongoDB, TypeScript

- Developed a complete social platform implementing secure authentication with JWT.
- Integrated visual statistics dashboards using Chart.js for activity analysis.
- Implemented cloud media storage management through Cloudinary.

Movie Data Management and Processing | Python

- Created a data processing system capable of handling catalogs in CSV and JSON formats.
- Implemented sorting algorithms and automatic generation of statistical reports.
